

TOP BEST WORKING KODI Addons List January 2018

 www.wirelesshack.org/top-best-working-kodi-video-add-ons.html

WirelessHack

Kodi lost many top repositories and add-ons last year including Colossus, Smash, and Ares Wizard.

Even though some Repos have shut down many others are still up, with a working list below.

Kodi add-ons are in a constant state of change with old ones that often were once the best sometimes replaced by new add-ons.

This page is regularly updated to reflect changes and show the top current best working Kodi add-ons.

Best Working Kodi Addons List for January 2018

Neptune Rising

Neptune Rising is a new Exodus / Covenant Fork from Blamo repository.

Like Covenant it plays movies and TV shows with updated code.

Covenant along with many other Exodus Forks have not been updated recently and are pulling in fewer links.

Neptune Rising is a Fork that has been updated and is currently working very well.

[How to Install Neptune Rising](#)

Genesis Reborn

Genesis Reborn is also a Fork from the once popular Genesis addon with updated working code.

Since it is from the Genesis code it has the same layout and options as Genesis / Exodus had.

It is a good addon to have and has been continuously updated, most recently on 1-2-2018.

[How To Install Genesis Reborn](#)

Cerebro ShowBox

Cerebro Showbox is a new video addon from Cerebro TV repository

The layout is the same as Exodus but with more options and features.

An option to Pair to sites is at the top for those who want more links.

It still works without having to Pair and pulls in many streams to choose from.

[How To Install Cerebro ShowBox](#)

Covenant

UPDATE: The Covenant Repo Colossus Has Shut Down

The Colossus Repository which contains Covenant has shut down.

This means the popular Covenant will not receive any more new updates.

If you already have Covenant installed it will keep working but as things break they will not be fixed.

UPDATE: A Repo called XvBMC is available to install Covenant

[Read Here for How To Install Covenant with the New XvBMC Repo](#)

Rebirth 2017

Rebirth 2017 is a Kodi video addon from Cypher Locker repository.

It is another Fork of the once popular Exodus addon with updated code and links.

Since Exodus is no longer being maintained many forks have come along including Rebirth 2017 which has been working very well.

How To Install Live Tube Kodi Addon

.....

What Is Kodi?

Kodi is a free Open Source media player that is available for many hardware platforms from a desktop computer to a smartphone.

Originally called XBMC it has been constantly updated with new versions.

Kodi by itself is a very nice free media player. Addons that are installed into Kodi are what give it more functionality.

For example a video addon will play movies and TV shows, while a music addon will stream music.

[Read Here for A Guide To Kodi and Streaming Movies / TV Shows](#)

What Is a Kodi Addon?

A Kodi addon is a program that runs within Kodi much like an App on a smartphone.

There are many kinds of addons for Kodi with the most popular ones being Video addons that play movies and TV shows.

Kodi add-ons have exploded in the last year with new ones coming out almost daily. We add new ones that are found to be working to this list and non-working ones removed.

No addons or plugins are coded by us and we have no connection with Kodi. Most all programs listed here are coded by third party sources.

How Is a Kodi Addon Installed?

Addons are installed from a Repository that holds the addon for download.

A Repository is a website that host the files for download.

The correct URL web address for the Repo needs to be typed into Kodi to install it.

Repositories can become overwhelmed with traffic at times which slows them down or even causes them to crash.

This page is updated regularly for the best working repository URLs and working add-ons.

What Is a VPN?

A VPN provides privacy and security while being online.

Entities such as Internet Service Providers or unscrupulous persons will only see encrypted data.

This gives a user anonymity as well as privacy while online.

A VPN is not necessary to use Kodi but can hide all online activities which has become very desirable.

The most popular VPN to use with Kodi is [IPVanish](#) since they are Kodi friendly, have worldwide high speed servers, and don't keep any logs.
